

VASUDEV TEJAM

Software Engineer

Mumbai, India | +91-8080187131 | tejas19tejam@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

Software Engineer with **3.6 years** of experience developing modern web applications using React, TypeScript, and Node.js. Experienced in API design, system performance improvements.

TECHNICAL SKILLS

JavaScript, TypeScript, Python, React.js, Next.js, Node.js, Express.js, Django, REST APIs, MongoDB, PostgreSQL, AWS (EC2, S3), Basic CI/CD exposure, DSA, API Design, Authentication & Authorization, Performance Optimization, System Design (Basics), RESTful Services, Problem Solving.

EXPERIENCE

Full Stack Developer

Sumcircle Technologies Pvt Ltd

Dec 2024 – Present

Ghatkopar, Mumbai

- Designed and implemented **RESTful APIs** using Node.js and MongoDB with **JWT-based authentication and role-based access control**, supporting HR and property modules.
- Optimized database queries and API response handling, reducing **average API latency by ~35%** and improving system reliability.
- Built **type-safe, reusable React + TypeScript components**, improving frontend maintainability and reducing UI bugs.
- Contributed to **deployment and release workflows**, cutting release turnaround time by **~70%**.
- Collaborated cross-functionally with design, QA, and backend teams in **Agile/Scrum**, delivering production-ready features on tight deadlines.

Assistant System Engineer

Tata Consultancy Services

Aug 2022 – Dec 2024

Thane, Mumbai

- Developed and enhanced React-based frontend features for the NextStep recruitment portal **that serves 200K+ candidates**, with a focus on accessibility, modular architecture, and performance optimization.
- Refactored legacy UI code into reusable components, improving maintainability and reducing future development effort.
- Integrated frontend components with backend REST APIs, handling **loading states, error handling, and data consistency**.
- Participated in Agile Scrum ceremonies and collaborated with cross-functional teams to deliver features incrementally.

PROJECTS

HRMS System

(React, TypeScript, Django, PostgreSQL)

- Implemented a modular HRMS with onboarding, internal ticketing, and learning management (LMS) modules, supporting employee records, approval workflows, and competency tracking.
- Built reusable, configurable data tables using **TanStack Table** to support sorting, filtering, and pagination across modules, reducing custom UI implementations and lowering development effort by approx **30–40%**.
- Managed server-state synchronization and API interactions using **TanStack Query**.

Real Estate Platform

(React, Sanity CMS, Node.js, TypeScript, AWS)

- Designed and built a scalable property listing platform with region-based routing and structured content powered by a **multi-tenant Sanity CMS**, enabling independent content management across locations.
- Implemented frontend views using React, TypeScript, and Tailwind CSS to deliver visually rich layouts, responsive design, and consistent styling across property pages.
- Added support for high-resolution media and interactive property experiences, including rich visuals and 3D property views, optimized for performance and usability.

EDUCATION

Bachelor's Degree in Computer Science

University of Mumbai | 8.5 CGPA

Jun 2019 – Jun 2022
