

Professional Summary

Software Engineer with 3+ years of experience building and maintaining web applications using React, Node.js, and MongoDB. Experienced in developing REST APIs, integrating frontend and backend systems, and improving performance in production environments. Comfortable working in Agile teams and learning from existing system designs.

Education

Shree Pancham Khemraj Mahavidyalay, University of Mumbai

Bachelor of Science in Computer Science

2020 – 2022

Mumbai, India

Technical Skills

Languages: JavaScript, TypeScript, Python, HTML5, CSS3

Frameworks: React.js, Next.js, Node.js, Express.js, Django, TailwindCSS

Databases/Cloud: MongoDB, PostgreSQL, AWS, Sanity CMS

Tools: Git, VS Code, Postman, Jira, Agile/Scrum

Core Competencies

API Design · RESTful Services · Database Optimization · Problem Solving · Cloud Deployment · Code Review · Microservices · Data Structures & Algorithms · AI-Assisted Development

Experience

- Sumcircle Technologies

Full Stack Developer

Dec 2024 – Present

Ghatkopar, Mumbai

 - Developed and maintained backend REST APIs using Node.js and MongoDB for HR and property-management modules, focusing on authentication, role-based access, and data validation.
 - Improved backend performance by optimizing database queries and reducing redundant API calls, contributing to **35%** faster response times.
 - Implemented frontend features using React and TypeScript, integrating APIs and building reusable UI components aligned with design specifications.
 - Assisted in streamlining deployment and release workflows, reducing release turnaround by **70%**.
 - Collaborated with design and QA teams to deliver stable, user-friendly releases on tight timelines.
- Tata Consultancy Services (TCS)

Assistant System Engineer

Aug 2022 – Dec 2024

Thane, Mumbai

 - Worked primarily on frontend for the NextStep recruitment portal using React, improving UI structure, accessibility, and component reusability.
 - Refactored existing frontend modules into maintainable components, increasing reuse and improving long-term maintainability.
 - Integrated frontend components with backend APIs, handling data rendering, error states, and loading flows.
 - Participated in Agile Scrum ceremonies and collaborated with cross-functional teams to deliver features incrementally.

Projects

- Real Estate | React, Sanity CMS, Node.js, TypeScript, AWS, Framer Motion

Mar 2025 – Jun 2025

 - Designed backend APIs to support property listings, search filters, and CMS-driven content.
 - Implemented data models, API validation, and server-side logic for content delivery.
 - Integrated backend services with frontend components and optimized data-fetching flows.
- HRMS System | React, TypeScript, Django, PostgreSQL, TailwindCSS

Dec 2024

 - Built an HR platform featuring multi-level authentication, dashboards, and employee analytics.
 - Enhanced data validation with Zod schemas and optimized PostgreSQL queries for faster response.

Key Achievements and Engineering Exposure

- Recognized by clients and stakeholders for consistent delivery of stable, production-ready features.
- Exposure to basic system design and scalability considerations.
- Participated in design discussions for backend features.
- Assisted in improving API structure and error handling patterns.
