

Professional Summary

Full Stack Developer with 3+ years of experience delivering web platforms from concept to production. Skilled in building maintainable systems, improving performance, and deploying reliable features that enhance user experience and business outcomes.

Core Competencies

System Architecture · API Design · Database Optimization · Performance Tuning · Cloud Deployment · Test Automation · Observability & Monitoring · Microservices · Data Structures & Algorithms

Education

Shree Pancham Khemraj Mahavidyalay, University of Mumbai

Bachelor of Science in Computer Science

2020 – 2022

Mumbai, India

Technical Skills

Languages:JavaScript, TypeScript, Python, HTML5, CSS3

Frameworks:React.js, Next.js, Node.js, Express.js, Django, TailwindCSS

Databases/Cloud:MongoDB, PostgreSQL, AWS, Sanity CMS

Tools:Git, VS Code, Cursor, Postman, Jira, Agile/Scrum

Experience

Sumcircle Technologies

Full Stack Developer

Dec 2024 – Present

Ghatkopar, Mumbai

- Built HR and property-management applications with React, TypeScript, and Node.js, improving API response time by **35%**.
- Developed reusable UI components and design-system utilities that cut front-end effort by **60%**.
- Implemented REST APIs with authentication and MongoDB integration, ensuring data security and consistency.
- Automated deployment workflows using Cursor and Locofy, reducing release turnaround by **70%**.
- Collaborated with design and QA teams to deliver stable, user-friendly releases on tight timelines.

Tata Consultancy Services (TCS)

Assistant System Engineer

Aug 2022 – Dec 2024

Thane, Mumbai

- Enhanced the NextStep recruitment portal and raised accessibility compliance to **98%**.
- Created Node.js microservices and optimized MongoDB queries, reducing API latency by **25%**.
- Refactored React modules into maintainable components, increasing reuse and maintainability by **30%**.
- Worked with cross-functional teams in Scrum sprints to deliver consistent, high-quality features.
- Integrated automated tests into CI pipelines, lowering regression bugs by **15%**.

Freelance Web Developer

Independent Projects

Jan 2021 – Jul 2022

Remote

- Created responsive business websites for small enterprises and colleges using the MERN stack.
- Built a role-based user management system with analytics dashboards and automated workflows.
- Improved SEO and caching mechanisms, reducing page-load time by **35%**.

Projects

Luxedom | React, Sanity CMS, TypeScript, AWS, Framer Motion

Mar 2025 – Jul 2025

- Developed a CMS-based real estate platform with advanced search filters and smooth UI animations.
- Configured AWS S3 and CloudFront for asset delivery and monitored uptime through CloudWatch.

HRMS System | React, Django, PostgreSQL, TailwindCSS

Dec 2024

- Built an HR platform featuring multi-level authentication, dashboards, and employee analytics.
- Enhanced data validation with Zod schemas and optimized PostgreSQL queries for faster response.

Key Achievements

- Improved sprint velocity by **40%** through better architecture and automation practices.
- Mentored junior developers in modern full-stack techniques, improving code quality and delivery.
- Migrated legacy systems to modular MERN architecture, reducing maintenance overhead by **25%**.
- Recognized by clients for consistent delivery of stable, production-ready applications.
